

CONFIGURABLE
ORGANISATION
STRUCTURE/
HIERARCHY

Define, map and manage
your organisation hierarchy,
your way

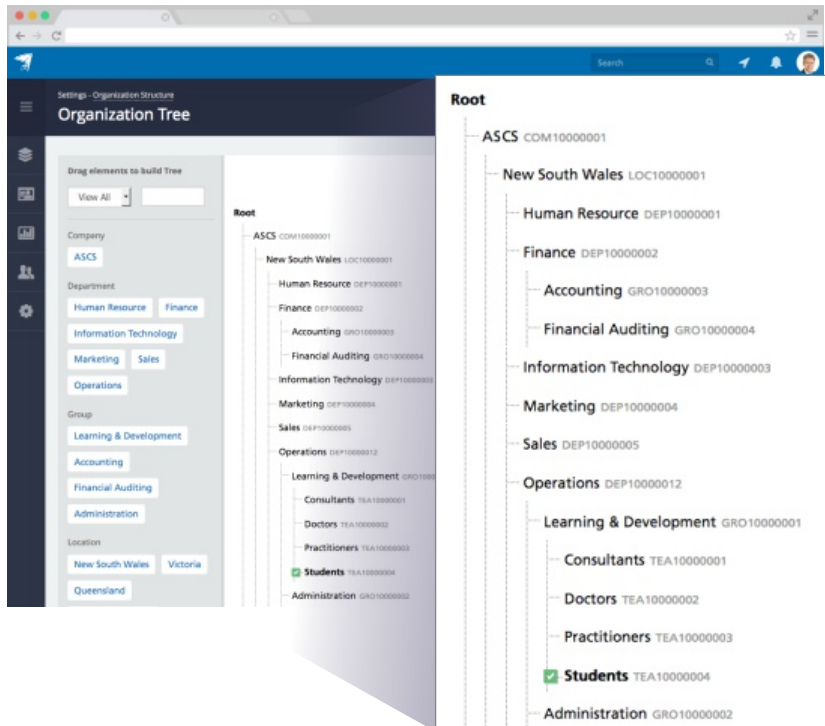

Every organisation, small or large, has its own organisation structure/ hierarchy to delineate lines of communication, policies, authority and responsibilities. It determines the extent and nature of how leadership is disseminated throughout the organisation as well as the method by which information flows.

UpsideLMS' Configurable Organisation Structure/ Hierarchy enables organisations to configure their organisation levels inline with their own structure/ hierarchy. From the simplest to the most complex, you can define, map and manage your organisation hierarchy.

Key Features & Benefits

Configurable Organisation Structure

- Configure organisation levels the way your organisation is structured
- Map and manage all types of organisation hierarchy, from the simplest to the most complex
- Easily build organisation hierarchy with UpsideLMS' intuitive interface
- Define and manage your organisation with multi-lingual support
- Define organisation modules using different methods - Upload, Form-Based and Drag Drop

Mapping Users to Organisations Hierarchy

- Map users to multiple nodes within an Organisation hierarchy
- Easily move any Organisation node along with child nodes and user data using simple drag and drop feature

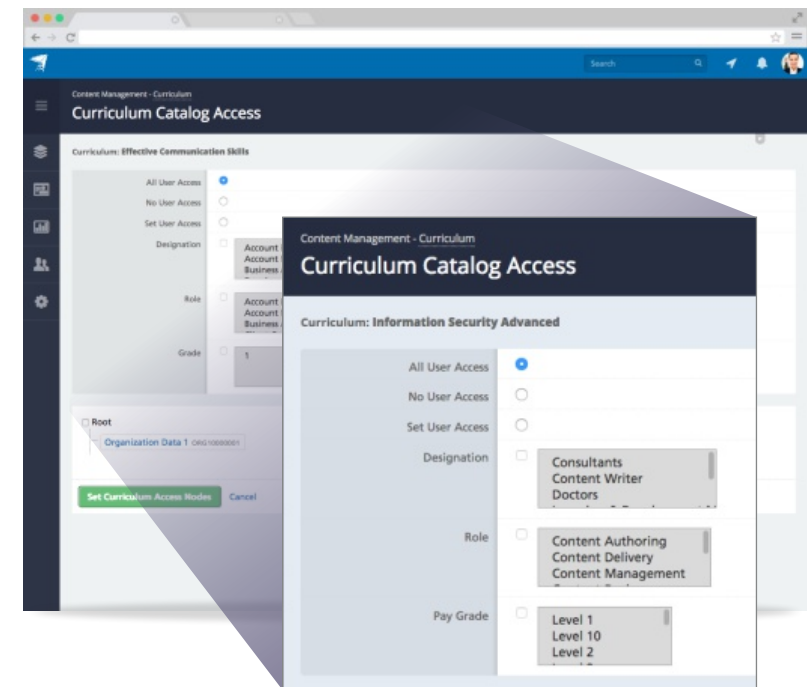

Key Features & Benefits

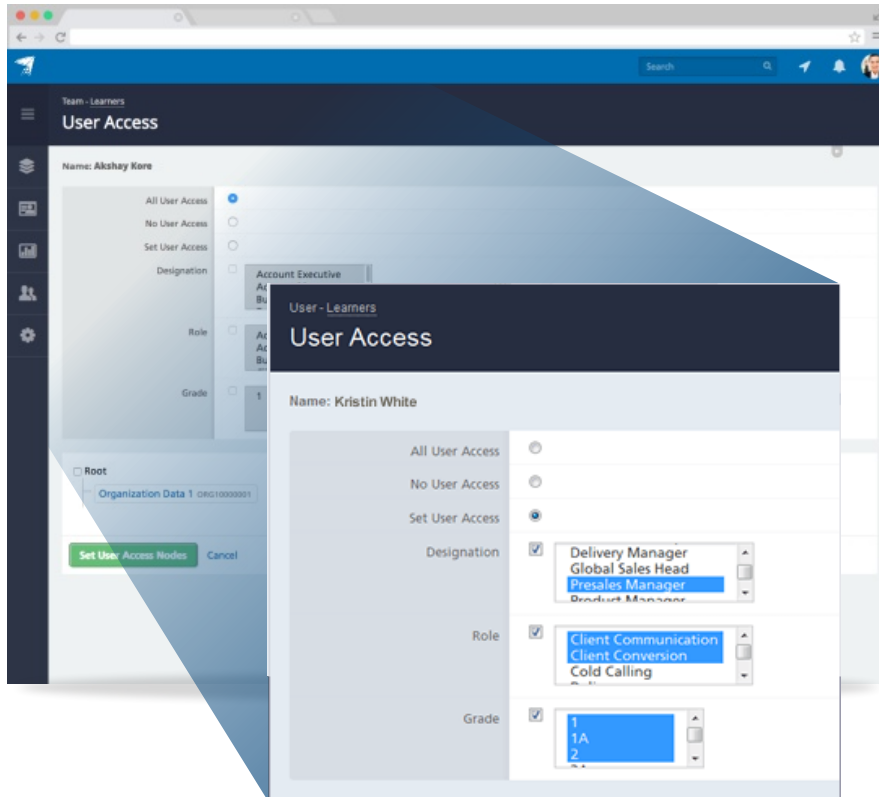

Filters

- Enables filtering of users limited to the organisation nodes that have been set by user
- Organisation filters provided on all screens that provide user information listing

Curriculum Access Management

- Author(s) of a curriculum can set the access rights, thereby managing who can deliver the curriculum to other users
- By setting this access, the author can limit access to the curriculum(s) only for user(s) who has the privilege for curriculum delivery and whose profile(s) is mapped to the organisation node to which the author user has provided access
- Author(s) of a curriculum can configure availability of the curriculum in Catalogs to - All Users, No Users or Specific Users
- Catalog can be assigned to specific users using a combination of Organisation tree, and additional modules like Designation, Role and Paygrade

Role-based Access Management

- Define and limit access for certain user roles that have admin side access for curriculum delivery and reporting to accessing users within an organisation structure only
- User with any of these roles will only be able to perform curriculum delivery and/ or reporting on other users whose organisation node access is available to them

About UpsideLMS

The BEST VALUE, SaaS LEARNING MANAGEMENT SYSTEM

A winner of 38 industry awards and recognition, UpsideLMS is a full-featured, Cloud-based Learning Management System.
